

Meeting Minutes – Week 1

Date: 24-08-2026

Meeting Number: 01

Participants:

- Shaima Saleem
- Niranjana S
- Amra Fathima
- Thejes Santhosh

Agenda

1. Understand the project requirements
2. Study the assigned STC89C52 microcontroller
3. Decide the development language
4. Divide team responsibilities
5. Plan Week 1 tasks
6. Set up the GitHub repository

Discussion

- The project requirements and expected features were discussed.
- **STC89C52 was assigned by the instructor** as the microcontroller to be simulated.
- The instructor required the team to use **GitHub** for project development and documentation.
- Java was discussed as the development language.
- Team responsibilities were divided among the members.
- The initial simulator architecture and Week 1 tasks were discussed.

Decisions

1. Java will be used for development.
2. Team responsibilities were assigned according to the project components.
3. The initial simulator architecture will be prepared.
4. GitHub will be used as instructed by the instructor.

Action Items

- **Shaima Saleem:** STC89C52 architecture study and README.
- **Niranjana S:** Memory documentation, weekly status update
- **Amra Fathima:** Data structure design and meeting minutes.
- **Thejes Santhosh:** Scheduler planning, project documentation.

Next Meeting

Agenda: Review Week 1 progress and discuss the next development tasks.
